

## PSPM MAHILA HOMEOPATHIC MEDICAL COLLEGE

23/1/B Kolgiri Nagar Hotgi road Majrewadi Solapur Tel: 0217-2991315

### **1.1.1: The Institution ensures effective curriculum planning, delivery and evaluation through a well-defined process as prescribed by the respective regulatory councils and the affiliating University.**

Since the Affiliated College only uses the curriculum that their parent institution offers, they are not actively involved in the design and development of the curriculum. Our institute has an official affiliation with MUHS and is recognized by NCH. In order to promote a healthy society, our goal is to establish homeopathy as a complete medical science. Our organization's goal is to raise and educate young people who want to become excellent homeopaths who are ethically pure, well-rounded, and role models. This is accomplished by offering top-notch medical education and a dedication to serving the community, nation, and all of humanity.

As required by AYUSH, NCH, and MUHS, we develop a yearly calendar and schedule to help us accomplish our aim and objective. Annual Gathering, NSS camp, Graduation Ceremony, Prize distribution, Winter and Summer Vacation, Term End / Preliminary Exam for regular & odd batch, Fresher's Day, BHMS Admission process, MUHS Theory / Practical-Viva Exams, Study Tour for 1 BHMS & IV BHMS, Annual Gathering, etc. are just a few of the events and activities that are included in the calendar year that runs from June to May.

At the beginning of the academic year, an advanced teaching program is created in each department, taking into consideration the number of staff members and the required curriculum. The daily schedule is followed in accordance with the schedule. Lesson plans for each subject are followed when giving lectures, and attendance is tracked. Students' feedback is periodically obtained in order to pinpoint any shortcomings and enhance the effectiveness of instruction.

As needed, each department plans seminars, exams, tutorials, get-togethers, and other events. It is possible to make difficult topics or questions more approachable by using techniques like dissection, tutorials, demonstrations, practicals, and clinical classes.

Through participation in field visits related to different departments and committees, including study tours, court visits, NSS camps, health checkups, and surveys, students improve their skills. We host guest lectures and seminars to help students develop the skills and attitudes that support imaginative, creative, and original thinking. Furthermore, we aggressively encourage them to take part in a range of workshops, symposiums, rallies, poster contests, seminars, and conferences.

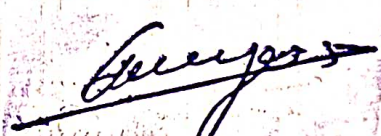

We also help them develop the independent thought processes and problem-solving skills that are

essential for doing research in academia. We accomplish this by bringing in well-known

people from many fields to take part in academic and cultural activities like convocation, prize giving, and swearing-in ceremonies. By planning different activities like drama, quiz, painting, mehendi, and Rangoli competitions, among others, we encourage the incorporation of creativity into the fields of art, education, and self-improvement.

Apart from the previously described exercises, we also occasionally evaluate the students through examinations and internal evaluations. This guarantees that every student is knowledgeable about medicine and helps to increase awareness in the community. Remedial actions are taken when a student's performance is below expectations. These protocols include speaking with parents directly or posting information on notice boards, corresponding with them via letters or electronic resource planning (ERP), notifying them via SMS, and offering coaching sessions. This approach sets our Institute apart and showcases the college's dedication to quality through its focus on values, emphasized sensitivities, and focused concerns.
