

## PSPM MAHILA HOMEOPATHIC MEDICAL COLLEGE

23/1/B Kolgiri Nagar Hotgi road Majrewadi Solapur Tel: 0217-2991315

**1.3.1:** The Institution integrates cross-cutting issues relevant to gender, environment and sustainability, human values, health determinants, Right to Health and emerging demographic issues and Professional Ethics into the Curriculum as prescribed by the University / respective regulative councils

Sincere efforts are being made by PSPM to include gender equality, nature and sustainability, human values, and professional ethics into the curriculum in order to foster the development of ambidextrous personalities. When it comes to opportunities, both male and female students are provided with equal possibilities. Participants are inspired to take part in a variety of programmes by the teaching staff. The Vishakha committee is established in order to address concerns about the well-being of women and to ensure their safety. By providing students with instruction in a variety of modules that are connected to the subject matter, such as gender and social equality, the students are encouraged to develop these values. The Ruhi Book and Trellis Workshop, which focuses on the environment and sustainability. Students are made aware of the dangers that are presented by climate change, seasonal deregulation, ecological distortion, bio diversity and its social and economic repercussions, and a variety of environmental risks via the organization of a number of different kinds of seminars, workshops, and environment days. Through excursions to a dairy farm, a water filtration plant, a tree plantation, a vanmohatsav programme, a swachata Abhiyaan, a conserve water initiative, a solar system, and an electric car charging station, students are exposed to ideas and concepts about sustainability and development.

**Principles of Humanity** The human ideals that set humans apart from the animal world are the foundations of humanity. M(N)HMC's mission is to provide a nurturing environment for aspiring homoeopaths and to help them develop into almost ideal human beings who are able to identify their own personal reason for attending the prestigious medical profession. In the area of ethical education, the Trellis Institute Nasik hosts a workshop. pupils are able to relearn human values and subsequent traits via the Ruhi Book 1 interactive workshop, which is another effort of this kind that aims to develop and enlighten pupils.

In order to better assist patients, students in the professional ethics programme get training in professional ethical standards beginning in their first year. Medical jurisprudence is a subject that is taught to students in their second year. During the third and fourth years, they are responsible for capturing patient data in the most scientific and courteous way possible. This is part of the process of developing their soft skills. During their internships, students put their principles into practice.
