EVENT REPORT

Name Of The Activity	Project selection	
Type Of Activity	Seminar	
Date And Time Of Activity	12/4/2022	10.30AM
No. Of Participants	44	
Resource Person	Dr.Abhimanyu	
Coordinators	Department of HOD	
Description	<p>The principal addressed the gathering and welcomed the guest. The HOD introduced about the guest and handled over to the speaker.</p> <p>He continued that the Project selection is an integral part of a company's process for choosing a project with the highest priority to accomplish. Projects and project completion can be important in transforming a company. Selecting the right project could create a better return on investment for a company, increase efficiencies, shorten time-to-market and lead to successful project delivery. In this article, we discuss what project selection is, why it is important and list some steps on how to select a project effectively. Once project managers receive project ideas or proposals, they often go through a process to assess and select a project that will move forward.</p> <p>Finally HOD delivered the vote of thanks and the guest was felicitated with a momentum</p>

EVENT REPORT

Name Of The Activity	Research Based Solely On Observations	
Type Of Activity	Seminar	
Date And Time Of Activity	20/05/2022	11.30AM
No. Of Participants	26	
Resource Person	Prof. Vijay Lakshmi	
Coordinators	Department of HOD	
Description	<p>The principal addressed the gathering and welcomed the guest. The HOD introduced about the guest and handled over to the speaker.</p> <p>The speaker stated that Observational research is a research technique where you observe participants and phenomena in their most natural settings. This enables researchers to see their subjects make choices and react to situations in their natural setting, as opposed to structured settings like research labs or focus groups.</p> <p>Finally the HOD delivered the vote of thanks and the guest was felicitated with a momentum.</p>

Coordinators	Department of HOD	
Description	<p>The principal addressed the gathering and welcomed the guest. The HOD introduced about the guest and handled over to the speaker.</p> <p>The speaker stated that the purpose of this exercise is to introduce a step-by-step guide to planning and writing project proposals incorporating project management techniques for external funding . To contextualise the various steps and procedures, the project development is discussed. This serves two purposes; it provides to prepare a written report for competitive grant and also for planning an analytical study, or both. one important area of concern in research is writing appropriate proposals for funding. Then he concluded</p> <p>Finally the HOD delivered the vote of thanks and the guest was felicitated with a momentum.</p>

EVENT REPORT

Name Of The Activity	A review on Evidence-based decision-making	
Type Of Activity	Seminar	
Date And Time Of Activity	21/11/2021	11.00AM
No. Of Participants	16	
Resource Person	Dr. Sarikha	
Coordinators	Department of HOD	
Description	<p>The principal addressed the gathering and welcomed the guest. The HOD introduced about the guest and handled over to the speaker.</p> <p>The speaker stated The number of studies published in the biomedical literature has dramatically increased over the last few decades. This massive proliferation of literature makes clinical medicine increasingly complex, and information from multiple studies is often needed to inform a particular clinical decision. However, available studies often vary in their design, methodological quality, populations studied and may define the research question of interest quite differently, which can make it challenging to synthesize their conclusions.</p> <p>Finally the HOD delivered the vote of thanks and the guest was felicitated with a momentum.</p>

Coordinators	Department of HOD	
Description	<p>The principal addressed the gathering and welcomed the guest. The HOD introduced about the guest and handled over to the speaker.</p> <p>The speaker stated that the Evidence-based practice is the integration of individual clinical expertise with the best available external clinical evidence from systematic research and patient's values and expectations into the decision making process for patient care. It is a fundamental skill to be able to identify and appraise the best available evidence in order to integrate it with your own clinical experience and patients values. The aim of this article is to provide a robust and simple process for assessing the credibility of articles and their value to your clinical practice.</p> <p>Finally the HOD delivered the vote of thanks and the guest was felicitated with a momentum.</p>

Resource Person	Dr. Ajay	
Coordinators	Department of HOD	
Description	<p>The principal addressed the gathering and welcomed the guest. The HOD introduced about the guest and handled over to the speaker.</p> <p>The speaker stated that Research methodology is a way of explaining how a researcher intends to carry out their research. It's a logical, systematic plan to resolve a research problem. A methodology details a researcher's approach to the research to ensure reliable, valid results that address their aims and objectives. It encompasses what data they're going to collect and where from, as well as how it's being collected and analyzed.</p> <p>Finally the HOD delivered the vote of thanks and the guest was felicitated with a momentum.</p>
