4.4.2: Institution frequently updates its IT facilities and computer availability for students including Wi-Fi.

The Mahila Homoeopathic Medical College & Hospital consistently enhances its IT infrastructure and computer accessibility for students, which includes LAN and WI-FI connectivity facilitated by numerous software applications. The number of accessible computers and laptops at the institution has increased from eight initially to a total of 65 PCs and 5 laptops today. The ultimate measure of their IT talents was providing instruction via e-learning to students during the COVID-19 epidemic. The college has obtained a licensed copy of the Zoom program, which has been selected as the medium for online instruction. Contemporary antivirus software and software for students, specifically designed for case taking and repertorization, include RADAR10, Radar Opus, Homopathwildfire, and Encyclopedia.

These copies are authorized and legitimate licenses. For both Quick Heal antivirus and Windows operating system.

The institution has two broadband internet connections with a speed of 100 megabits per second each, which are used for educational purposes for the students. It was widely used during the COVID-19 epidemic to provide online lessons.

There is a centralized facility available for students to use. The IT Hub provides students with access to 15 computers equipped with internet connectivity. Registers are kept to document the information of students, both entering and leaving. Both undergraduate students and interns may use this resource in the following manner: The students can employ these computers for browsing educational material and creating Power Point presentations, doing repertorization, accessing online libraries such as Shodhganga and MUHS, as well as using the scanner and printer facilities.

Completing the application for the test, scholarship application forms, and providing comments on the Anti-Ragging form.
